Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS

- "I want a plan that fits my budget."
- "Which places are worth visiting?"
- "Can I get everything in one place?"

THINKS

- Will I end up overspending?
- Is this route practical for one day?
- Planning is taking too long.

PERSONA
Aarav
(Student / Young Traveller)

DOES

- Searches many travel websites and blogs.
- Compares prices and timings manually.
- Saves places in notes and opens Google Maps separately.

FEELS

- Overwhelmed by too many options.
- Anxious about the budget.
- Excited about the trip.
