Data Flow Diagram

Level-1 Data Flow Diagram showing how data moves through TravelMate between external entities, processes, and data stores. The symbol legend below explains the notation used.

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., User, Groq AI API).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Generate Itinerary).
Open-ended rectangle	Data Store	A place where data is held for later use (e.g., Trips Database).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with the data passed.

TravelMate - Level 1 DFD

Data flow summary

Process	Input	Output / Data Store
1.0 Authenticate User	Email and password from the User	Session / auth status; user record in D1 (Supabase Auth)
2.0 Manage Trips	Trip details (destination, dates, budget, group, preferences)	Trip records stored in and read from D2 (Trips Database)
3.0 Generate Itinerary	Trip preferences; response from Groq AI API	Structured itinerary (destination, summary, days, activities) saved to D2
4.0 Display Itinerary, Map & Budget	Saved itinerary from D2; coordinates from Nominatim	Day-wise itinerary, numbered map pins and budget summary for the User
5.0 Export PDF	Itinerary details	A4 PDF itinerary downloaded by the User
