Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Standard JSX/JS and Python formatting.
2	Proper File Structure	Files and folders are logically organized	Yes	frontend/ (components, services) and backend/app (routes, schemas, services).
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Descriptive names such as trip, itinerary and budget values.
4	Function / Method Names	Functions are descriptively named	Yes	Names describe the action in each component and route.
5	Code Comments	Inline and block comments explain logic	Partial	Key logic is commented; more comments can be added.
6	Modular Design	Code is split into reusable functions/modules	Yes	Separate components, services, routes and schemas.
7	No Redundant Code	Duplicate or unused code is removed	Partial	To be re-checked in a final cleanup pass.
8	Error Handling	Exceptions and errors are handled gracefully	Partial	Loading, error and empty states and geocoding fallback exist; backend error paths to be reviewed.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	AuthModal.jsx	React (JSX)	Sign In and Sign Up flows from the navbar and call-to-action buttons	Medium
2	DayMap.jsx	React, Leaflet	Map shown for the days of an itinerary	High
3	supabase.js	JavaScript	Single Supabase client shared by components	High
4	pdfExport.js	JavaScript, jsPDF	PDF export action from the itinerary modal	Medium

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
5	groq_service.py	Python	Itinerary generation used by the itinerary routes	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Clear frontend/backend separation with logical folders.
Readability	4	Readable components and descriptive names.
Reusability	4	Shared services and components.
Documentation / Comments	3	README and more inline comments to be added.
Overall Score	3.75	Self-assessed average; update after final code review.
